

FOR A SIMPLER LIFE

Thank you for requesting a list of mower repair shops!

For over sixty years we've worked hard to serve our Amish friends and others seeking a simpler and more self-sufficient lifestyle. Our catalog is packed with thousands of products that don't require electricity or fuel.

Reel mowers fit this niche perfectly. Unlike noisy, cantankerous gas-powered lawn mowers, reel mowers help preserve your country peace and quiet. Listening to the birds sing sure beats the enduring raucous racket of a two-cycle gas engine! Reel mowers are less expensive, less likely to need repairs, and they don't pollute either. And, while using one, your body burns over 400 calories per hour (as much as an hour of playing tennis).

Our commitment to serving you to your total satisfaction led us to compile this list of reel mower repair shops. We believe in backing up the products we sell with parts and service. Unfortunately, we don't have access to the specialized equipment and tools (some of which are no longer made) that are needed to sharpen and repair reel mowers but, we can refer you to someone who does.

Good luck with your mower!

Galen Lehman, President

Shops that repair and/or sharpen reel mowers

Daniel L Esh, 17 Center Street, PO Box 203, Intercourse, PA 17534.
Phone (717) 768-3166 (let ring). Most jobs take 1-2 weeks.
